

Stainless Steel Window Screen

Stainless steel window screen is woven from stainless steel wire, which is more durable and much stronger than the standard insect screen. It allows superior airflow and meets the high standard of insect protection. The application is not limited to windows, doors & porches, but also can be used as supportive layer for filters, as well as used in livestock farms epidemic prevention, orchard planting protection & window screen projects etc.

Basic information of Jiushen stainless steel window screen:

Standards: Q/EQI-40-2007 ASTM B117-09 ASTM E2016-15

Weaving Pattern: Plain weave selvaged edge/rough selvedge, cross (skein) weave

Material: SS 201, SS304, SS304L, SS316, SS316L

Benefits of stainless steel window screen:

High mechanical protection performance
 Good toughness
 Corrosion resistance
 Outstanding durability
 Good ventilation, no shading & easy to clean

Application of stainless steel window screen:

Windows, doors & porches
 Supportive layer for magnetic filters
 Livestock farm epidemic prevention, orchard planting protection
 Window screen projects etc.

Specification:

Mesh	Wire Dia (mm)	Width (mm)	Length (m)	Remarks
14x14	0.230	200-2700	1-1000	Length ≥ 400 m needs to be stitched
16x16	0.200			
17x15	0.200			
18x16	0.230			
18x17	0.200			
20x18	0.180			
20x20	0.200			
20x20	0.150			
24x22	0.150			
24x22	0.130			
25x22	0.165			
8-30 mesh, 0.13-0.80 mm wire dia, all can be customized
