

Aluminum Window Screen

Aluminum window screens are woven from aluminum-magnesium alloy wires, also known as "aluminum-magnesium alloy screens". The color of aluminum alloy window screen is silver white. Characterized by light weight, corrosion resistance, good toughness, high temperature resistance and long service life. It does not rust and become mouldy even in a humid environment. Widely used in residential and various constructions for window screen projects.

Basic information of Jiushen aluminum window screen:

Standards: Q/EQI-40-2007 ASTM B117-09 ASTM E2016-15

Weaving Pattern: Plain weave selvaged edge/rough selvedge, cross (skein) weave

Material: 5154A(H39/H19)

Benefits of aluminum window screens:

- Light weight
- Good toughness
- Corrosion resistance
- High temperature resistance
- Long service life
- Do not rust and become mouldy
- Good ventilation, no shading & easy to clean

Application of aluminum window screens:

Residential and various constructions for window screen projects.

Specification:

Mesh	Wire Dia (mm)	Width (mm)	Length (m)	Remarks
14x14	0.360	200-2700	1-1000	Length ≥400 m needs to be stitched
18x14	0.210			
	0.220			
	0.230			
	0.240			
	0.250			
18x15	0.230			
18x16	0.240			
				OEM is available
