

High visibility flame-retardant stainless steel window screen

High visibility flame-retardant stainless steel window screen is in R&D, dedicated to the high-end window screen market.

The high visibility flame-retardant window screens currently available on the market are mainly vinyl-coated glass fiber window screens, which have flame-retardant functions, but not ideal for protection and can be easily destroyed by children, pets or intruders. To solve this problem, we set out to develop high visibility flame retardant stainless steel window screens.

High visibility flame-retardant stainless steel window screen mesh is woven from polyester coated stainless steel wire, with the following outstanding advantages:

Super protective function, while effectively blocking bugs, and the window screen will not be damaged by children, pets or intruders

Excellent flame retardant performance

Anti-aging, strong weather resistance, 10 years of super long service life

Beautiful, invisibility and good ventilation

Easy cleaning

Color for high visibility flame retardant stainless steel window screen:

Black, white, gray.

Weaving Pattern: Plain weave

Material: SS304, SS316

Jiushen high visibility flame-retardant stainless steel window screens can not only be flame-retardant, add another important layer of protection to your family and properties, but also can meet all your high-standard and high-protection requirements for high-end window screens--keep bugs, flames and intruders all out of your window and porch!
